4. Discussion of the results reached:

To analyze the provided results, we will organize them into three tables (one for each experiment: 95% freezing, 90% freezing, and 80% freezing). Then, we will analyze the performance of each model (DOSTE, DeepSeek-V3, ChatGPT) based on the provided metrics (Rouge-1, Rouge-2, Rouge-L, BLEU, and text length). Finally, we will determine the best experiment for DOSTE.

$$ROUGE - 1 = \frac{\text{Number of overlapping unigrams between the generated and reference text}}{\text{Total number of unigrams in the reference text}}$$

$$ROUGE - 2 = \frac{\text{Number of overlapping bigrams between the generated and reference text}}{\text{Total number of bigrams in the reference text}}$$

$$ROUGE - L = \frac{\text{Length of the longest common subsequence between the generated and reference text}}{\text{Total number of words in the reference text}}$$

$$BLEU = BP \cdot \exp \left(\sum_{n=1}^N w_n \log p_n \right)$$

Where:

- BP is the **Brevity Penalty**, calculated as:

$$BP = \begin{cases} 1 & \text{if } c > r \\ e^{(1-r/c)} & \text{if } c \leq r \end{cases}$$

- c is the length of the generated text.
- r is the length of the reference text.

$$\text{Average Length} = \frac{\sum_{i=1}^N \text{Length of generated text}_i}{N}$$

Table 1: Results for 95% Freezing

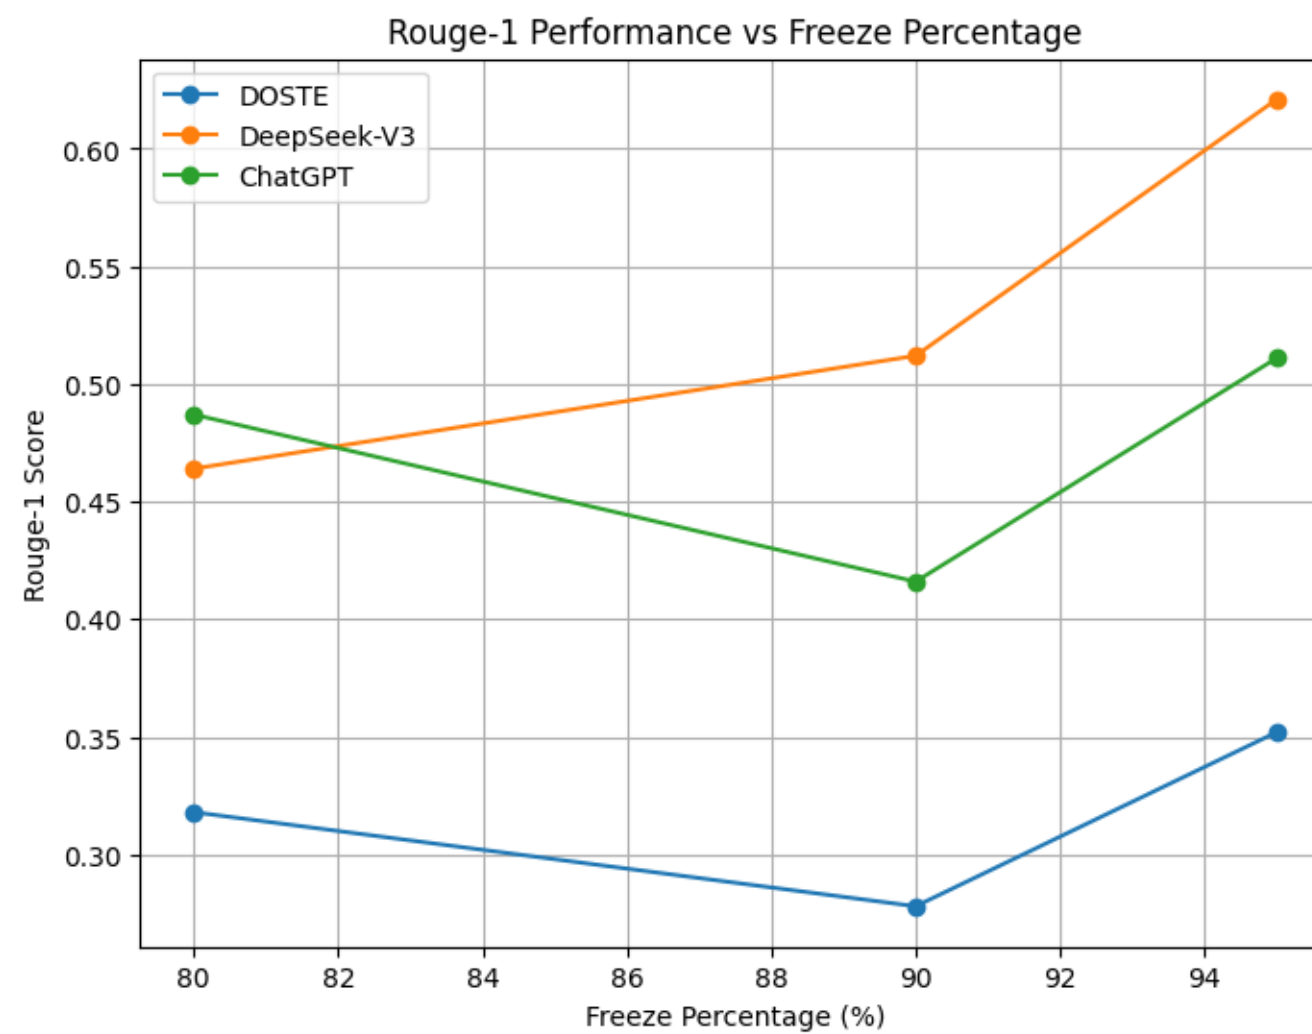

Model	Rouge-1	Rouge-2	Rouge-L	BLEU	Average Length
DOSTE	0.352	0.191	0.333	0.109	55.74
DeepSeek-V3	0.621	0.459	0.586	0.335	23.37
ChatGPT	0.511	0.322	0.445	0.179	20.53

Radar Chart: Model Performance Comparison

Analysis of Results

1. DOSTE Performance:

- In the **95% freezing** experiment, DOSTE performed better compared to the other experiments, achieving the highest values for Rouge-1 (0.352), Rouge-2 (0.191), Rouge-L (0.333), and BLEU (0.109).
- In the **90% freezing** experiment, DOSTE's performance dropped significantly, with the lowest values across all metrics (Rouge-1: 0.278, Rouge-2: 0.106, Rouge-L: 0.266, BLEU: 0.034).
- In the **80% freezing** experiment, DOSTE's performance improved compared to the 90% freezing experiment but remained lower than the 95% freezing experiment.

2. DeepSeek-V3 Performance:

- DeepSeek-V3 achieved the best performance across all experiments, outperforming both DOSTE and ChatGPT in all metrics.
- In the **95% freezing** experiment, the values for Rouge-1 (0.621), Rouge-2 (0.459), Rouge-L (0.586), and BLEU (0.335) were the highest.
- In the **90% freezing** experiment, performance slightly decreased but remained the best compared to the other models.
- In the **80% freezing** experiment, performance was good but lower than in the 95% freezing experiment.

3. ChatGPT Performance:

- ChatGPT's performance was moderate across all experiments, outperforming DOSTE in most metrics but falling short of DeepSeek-V3.

- In the **95% freezing** experiment, the values for Rouge-1 (0.511), Rouge-2 (0.322), Rouge-L (0.445), and BLEU (0.179) were better than DOSTE.
- In the **80% freezing** experiment, ChatGPT outperformed DOSTE in all metrics.

4. Average Text Length:

- DOSTE produced longer texts in all experiments (with an average of 55.74 in 95% freezing, 49.11 in 90% freezing, and 54.42 in 80% freezing).
- DeepSeek-V3 and ChatGPT produced shorter texts, which may indicate a greater focus on quality rather than quantit

Best Experiment for DOSTE

Based on the results, the **95% freezing** experiment is the best for DOSTE, as it achieved the highest values across all metrics (Rouge-1, Rouge-2, Rouge-L, and BLEU) compared to the 90% and 80% freezing experiments. However, DOSTE's performance still lags behind DeepSeek-V3 and ChatGPT in all experiments.

Conclusion

- **DeepSeek-V3** is the best-performing model overall, outperforming both DOSTE and ChatGPT in all experiments.
- **ChatGPT** came in second, outperforming DOSTE in most metrics.
- **DOSTE** was the weakest performer but showed its best performance in the **95% freezing** experiment.
